Product Introduction

Light is hope and the gift of discovery.

A hero is a person who follows the light.

We can't let go of the heroes that strived for a brighter world.

For our heroes, it's on and at WEM we are excited about history.

At WEM, our heroes of the electrical dawn are the drivers for the inspiration of our company.

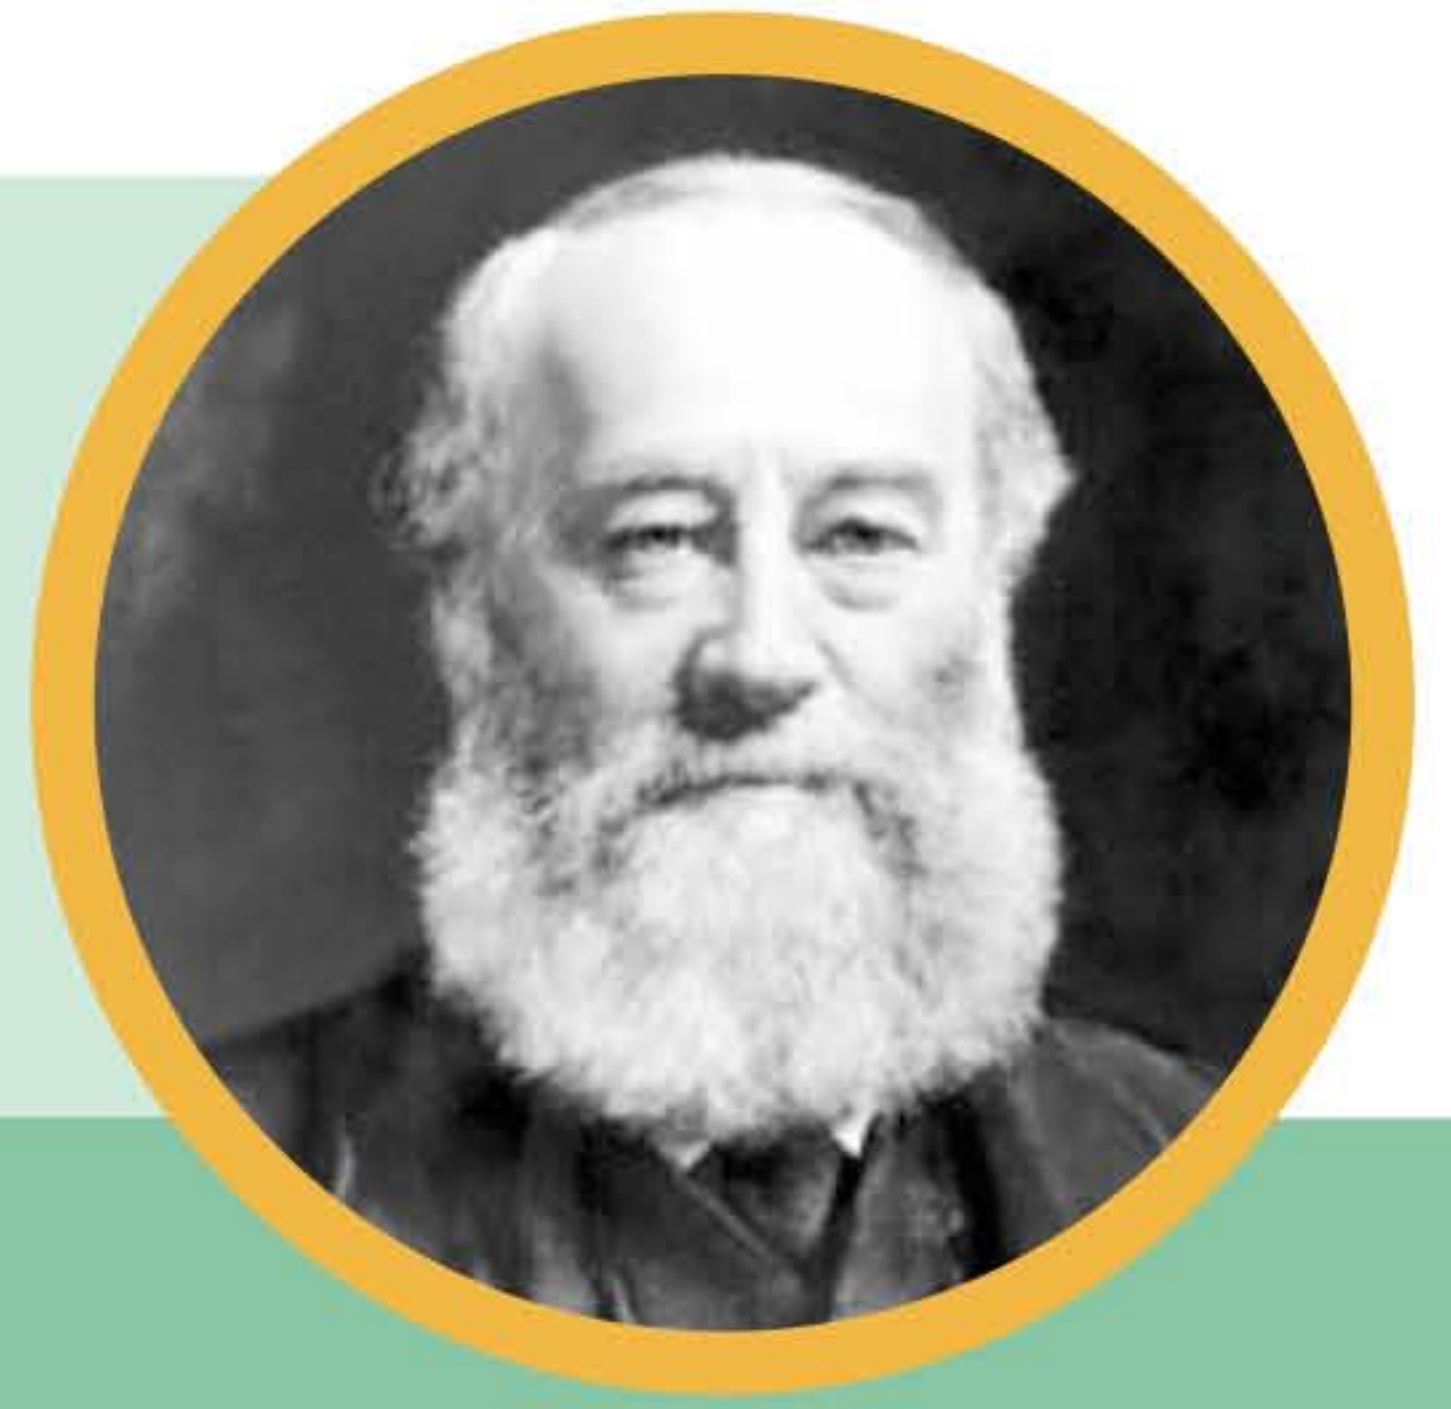

Each hero has a unique story and each hero made a mark on humanity. Each hero pursued a vision for a world that was full of light. Engage in our product series and you will discover the thread of innovation that is still alive and still on today. From André-Marie Ampère and his passion for classical electromagnetism to Nikola Tesla, with a determination to integrate design patterns to realize our modern alternating current.

The WEM products series is a thank you to the pioneers of the electrical revolution. We encourage you to discover with us. When you choose WEM, you are sharing in our thank you.

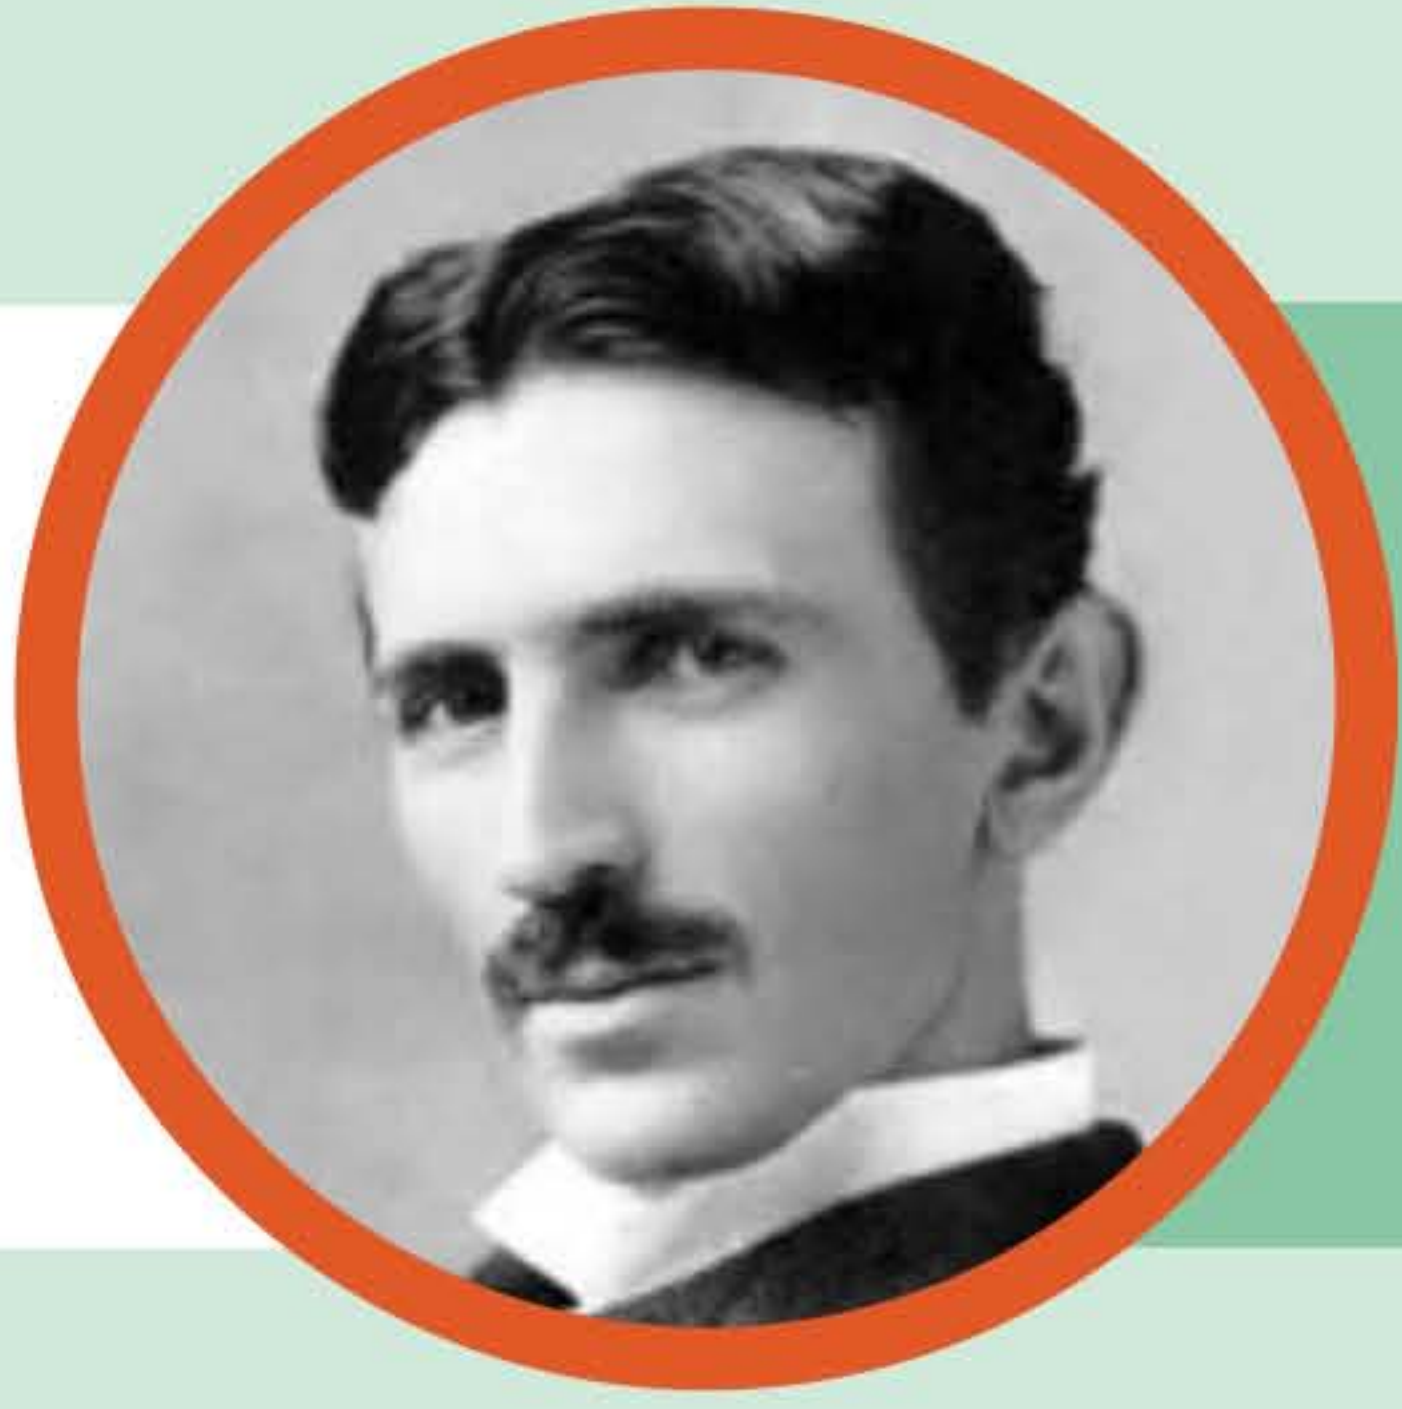

WEM turns on lights for industries and cultures, with a hope for a future that is safe and bright.

With WEM, it's on.
